President's Management Agenda Cross-Agency Priority Goal #2

Leverage Data as a Strategic Asset

to grow the economy, increase the effectiveness of the Federal Government, facilitate oversight, and promote transparency.

Executive Leadership

- Department of Commerce Under Secretary for Economic Affairs, performing as Deputy Secretary
- U.S. Small Business Administration
- Federal Chief Information Officer of the United States
- Chief Statistician of the United States
- White House Office of Science and Technology Policy

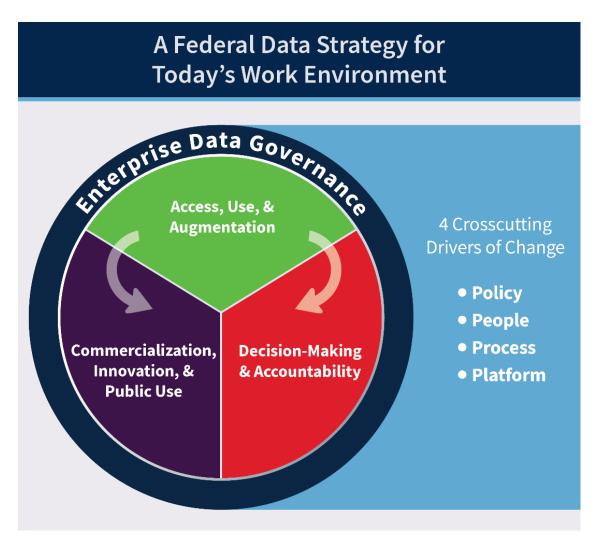

Achievement of the goal will leverage four high-level areas, supported by four cross-cutting drivers of change.

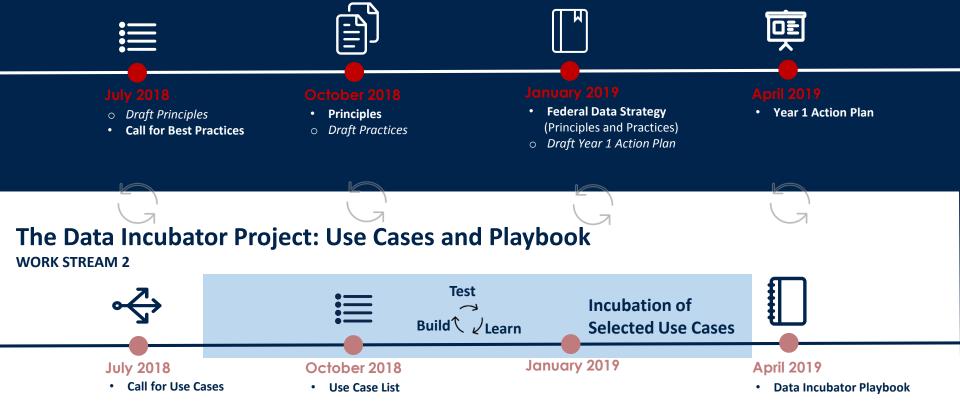

Breaking Down Silos to Bring in Expertise Across Government

Engaging Stakeholders Throughout the Development of the Strategy

Working Iteratively to Incorporate Feedback Along the Way

Federal Data Strategy

What is the Federal Data Strategy?

The use of data is transforming the world. The way the Federal Government provides, maintains, and uses data has a unique place in society and maintaining trust in federal data is pivotal to a democratic process. The Federal Government needs a coordinated and integrated approach to using data to deliver on mission, serve the public, and steward resources while respecting privacy and confidentiality.

The Federal Data Strategy will define Principles, Practices, and a Year 1 Action Plan to deliver a more consistent approach to federal data stewardship, use, and access. The Federal Data Strategy development team will also test solutions and assumptions along the way with The Data Incubator Project, which will help identify priority use cases and methods that should be replicated or scaled.

The four Federal Data Strategy areas for exploration
