WSS and George Mason University Sponsor a Mock Advanced Placement (AP) Statistics Exam

Students from local area high schools, accompanied by their teachers, gave up their Saturday morning to take an exam hosted by the Department of Statistics and proctored by members of the George Mason University Stem Education Club on April 25. More than 160 students from eight local high schools practiced their statistical knowledge by taking a mock Advanced Placement (AP) statistics exam, which served as real-time practice for the test that will be administered in early May by the College Board. High schools participating in the event were: Fairfax, Herndon, Oakton, John Champe, W.T. Woodson, Stonewall Jackson, Osbourne Park and Robinson.

Assistant Professor Beth Johnson, of the Volgenau School of Engineering’s Department of Statistics, who organized the session said, “This event was a wonderful way for the university to make connections with the local community. Not only did it provide the students with valuable practice as they prepared for the actual exam, it also allowed teachers the opportunity to meet and discuss issues related to the AP Statistics curriculum.”

As the students answered the free response and multiple-choice sections of the practice exam, their teachers discussed issues related to the AP Statistics curriculum and the scoring of exams.

Meta Smith, a mathematics teacher and department chair at Herndon High School, was excited about the opportunity and said she learned a great deal from the workshop. She hopes to recruit additional teachers and students for next year.

The event was partially sponsored by the Washington Statistical Society, and the American Statistical Association provided promotional materials. Johnson, who has experience leading similar events at the University of South Carolina, The College of New Jersey, and Wilkes University, hosted the event.

The department anticipates hosting this event on a regular basis.

A Brief History of Classification and Regression Trees

June 4, 2015
12:30–1:30 pm

Wei-Yin Loh, University of Wisconsin - Madison

Mike Fleming

Methodology Section

Bureau of Labor Statistics Conference Center

To be placed on the seminar attendance list at the Bureau of Labor Statistics, you need to e-mail your name, affiliation, and seminar name to wss_seminar@bls.gov (underscore after ‘wss’) by noon at least 2 days in advance of the seminar, or call 202-691-7524 and leave a message.

Bring a photo ID to the seminar. BLS is located at 2 Massachusetts Avenue, NE. Use the Red Line to Union Station.

Parking in the area of BLS is available at Union Station. For parking information see http://www.unionstationdc.com/parking. No validation is available from BLS for reduced parking rates.

Abstract:

It has been 52 years since the publication of AID (Morgan and Sonquist, 1963), the first regression tree algorithm. Owing to its novelty at the time and to the many questions it left unanswered, the paper was met with mostly criticism and cynicism. As a result, little progress was made until the appearance two decades later of CHAID (Kass, 1980), CART (Breiman et al., 1984), ID3 (Quinlan, 1986), and FACT (Loh and Vanichsetakul, 1988). These second-generation methods brought new ideas that resolved many of the issues of AID, but they also revealed some fundamental computational and statistical problems of their own. Research accelerated over the last two decades, being spurred almost simultaneously by the rapid increase in computing power, the rapid growth in the size and complexity of data sets, and
the desire for more flexible statistical techniques. This talk will
give a brief critical review of the history of the subject and the
current state-of-the-art algorithms.

Abstract:

This Washington Statistical Society conference on curb-stoning is the third in a series of events on the same subject. The first event was sponsored by the WSS Methodology Section last December, and the second event was recently produced by the New England Chapter of the American Association for Public Opinion Research. Curb-stoning is a colloquialism for the practice of statistical enumerators and their supervisors to fabricate respondent data. Their techniques may be clever and even sophisticated. The speakers of this event will discuss the motives for curb-stoning, programs to detect its occurrence, and methods to discourage its practice.
The Cheater Problem Revisited: Lessons from Six Decades of State Department Polling

Nearly 70 years after Leo Crespi’s paper “The Cheater Problem in Polling,” the challenge of preventing, detecting, and - in those rare instances - mitigating the damage from falsification remains. In the U.S. Department of State’s Office of Opinion Research, which owes its founding to Dr. Crespi and other survey pioneers, we face this issue in some of the 200 surveys we conduct in nearly 100 countries yearly. Our office has faced institutional challenges in confronting falsification, including the instinct to shy away from tarnishing all of our research in the eyes of a sometimes skeptical audience, doubly so when the stakes of representing international publics are high. We have also grappled with limited capacity, both in terms of time for uncovering possible fraud and in the technical ability to systematically do so. This presentation will underscore the need to weave the ethos of confronting falsification into the fabric of survey research, and not just in an international context. It will focus specifically on the quality control process that State’s Office of Opinion Research has developed over several years. The process includes a procedural checklist that our researchers must follow before reporting data, changes to our requirements for collecting paradata and metadata, and systematic guidance on approaching field firms to deal with cases of possible fraud.

~ Regina Faranda
Acting Director, Office of Opinion Research, U.S. Department of State

Technical Aids for Deterring and Detecting Falsification of Survey Data

Quality assurance teams encounter ever-changing challenges in confirming the authenticity of interviewer-collected survey data. At RTI, several precautionary measures during and after data collection aid the monitoring of data collectors and review of data after receipt. When feasible, computer audio-recorded interviewing (CARI) allows detailed oversight of in-person surveys and augments live-monitoring of telephone interviews. Collection of global positioning system (GPS) coordinates can confirm the location of interviews conducted by field staff using mobile devices. For some surveys, on-location image-capture helps to validate authenticity. After data receipt at RTI, datasets undergo systematic review for high levels of unit or item non-response, paradata outliers, duplicate records and unexpectedly high levels of CARI refusals. The combination of these techniques provides an adaptable, multi-sourced, evidence-based process for quality assurance and control.

~ M. Rita Thissen
Department Manager, Center for Technology Solutions, Research Computing Division, RTI International, Research Triangle Park, NC 27709
Curbstoning Detection and Prevention at Census: New Initiatives

Curbstoning detection and prevention is one of several survey lifecycle quality assurance techniques conducted at Census. Recommendations from the Office of the Inspector General of the Department of Commerce, corroborated by the House Committee on Oversight and Government Reform, are being implemented Bureau-wide with the full backing of the Census Director. This presentation highlights new initiatives planned or currently underway to detect and prevent curbstoning at Census.

These operational initiatives include a centralized reinterview program, a redesign of the reinterview sample, implementation of Computer Audio Recorded Interviewing (CARI) pioneered by the Research Triangle Institute (RTI), and extensive use of paradata and administrative data. These curbstoning detection and prevention initiatives together will promote accurate, objective decisions made quickly and cost-effectively to ensure that our data and our employees adhere to our quality standards.

CALL FOR PAPERS/CONFERENCE

Office of Revenue Analysis,
DC Office of the Chief Financial Officer

FFC/2015: The 21st Federal Forecasters Conference

CALL FOR PAPERS

The FFC Board invites you to present a paper at one of the afternoon concurrent sessions. Please note, papers are not restricted to the official conference theme and may cover any subject relating to forecasting or estimation. Presenters are encouraged to provide a written version of their presentation. Individual presentations of the papers will be limited to 15 to 20 minutes in length. Please send your abstract of 100 or fewer words to: Michelle.Chu@irs.gov by August 1, 2015.

All presenters must provide an electronic copy of their paper in a Microsoft Word file (preferred) or Adobe Acrobat PDF file by November 1, 2015 to William Hussar (william.hussar@edu.gov) to ensure their paper’s inclusion in the conference proceedings.

See next page for the recommended format. All papers presented in the afternoon concurrent sessions and provided by November 1, 2015 will be published as Proceedings of the 2015 Federal Forecasters Conference. A panel of judges will determine the best paper presented during the concurrent sessions and recognition will be awarded at the following Federal Forecasters Conference.
Title Centered in 12-Point Bold Times New Roman Type
Author and organization centered in normal 10-point Times New Roman

Please compose, format, and spell check your document in Microsoft Word. Format all text in a double-column, normal 10-point Times New Roman font type, and columns should be square. Left and right margins must be 1" and the spacing between the two columns must be 0.2".

Text should be single-spaced, with double spacing between paragraphs. Small tables and figures may be included in the column text, but place all larger tables and figures at the end of the document in single column format.

Refer to the FFC/2014 Proceedings volume for examples of the recommended paper format (available at www.federalforecasters.org).

All presenters must provide an electronic copy of their papers in a Microsoft Word file (preferred) or Adobe Acrobat PDF by November 1, 2015. Please email the file to William Hussar at william.hussar@ed.gov. Final papers will be published on the Federal Forecasters website as an Adobe Acrobat PDF file.

Your paper may be omitted from the FFC/2015 Proceedings Volume if you fail to conform to these guidelines.
FFC/2015--- The Federal Forecasters Conference Contest
Official Entry Form
Entries due August 1, 2015

Name: __________________________________________
Agency/Department: _______________________________________
Address: _____________________________________________
Phone: ________________________________________________
E-mail Address: _________________________________________

Please write your forecasts in the boxes provided for the following 5 items. Put your forecasts in the same format as the example. The forecasts will be judged by the ranking method (analysis of variance by ranks).

We will announce the winner at the FFC/2015 Conference, Thursday, September 24, 2015. All decisions of the contest judges are final. FFC board members are not eligible to participate in this forecasting contest. Each person may submit only one entry. All contest entries are confidential. For more information, please call Brian Sloboda at (202) 693-5904 or e-mail at sloboda.brian.w@dol.gov. Each individual will receive confirmation of receipt of his/her submission.
FFC/2015: The 21st Federal Forecasters Conference

Date: September 24, 2015
Location: Bureau of Labor Statistics Conference and Training Center
2 Massachusetts Avenue, NE
Washington, DC 20212
Check-In: 8:00 am - 9:00 am
Schedule: 9:00 am - 4:15 pm
(Plenary and concurrent session schedule to follow)

Abstract Submissions Due: August 1, 2015
 Contest Entry Deadline: August 1, 2015
Register Online By: September 10, 2015 at www.21st-ffc-2015.eventbrite.com
There is no charge for participation

Theme: Are Forecasts Accurate? Does it Matter?

Forecasts typically undergo a review before they are released to judge whether or not the forecast adheres to commonly accepted technical practice. Forecasts often face an ex post evaluation that focuses on realized accuracy. Whether forecasting immigration or emigration, agricultural production and price, mineral reserves and prices, or forecasting the direction of labor, economic, education, energy, and revenue trends, forecasters face similar private and public scrutiny. How are forecasts evaluated? How is forecast accuracy judged? How does the accuracy of forecasts affect users? Add your voice to the discussion. Join us at the 21st Federal Forecasters Conference, where these and other forecasting questions will be addressed.
Suggested Presentation Topics for the Afternoon Sessions

- General topics in forecasting
- Case studies: Using forecasts in policy decision making
- Forecast methodology
- Forecast evaluation

Member Spotlight
Introducing your fellow members and showcasing the diversity of the WSS membership

Meet WSS Member Connie Citro...

1. Where do you work and what do you do?
I am the staff director for the Committee on National Statistics, a standing unit established at the National Academy of Sciences/National Research Council in 1972 to improve the information and statistical methods on which public policy decisions are based. CNSTAT’s rotating membership of expert volunteers oversees the projects carried out by study panels and workshop committees under its aegis. (The NAS/NRC, an independent nonprofit organization charged in an 1863 congressional charter to provide advice to the government in scientific and technological areas, has about 50 such standing units—e.g., Food and Nutrition Board, Committee on Applied and Theoretical Statistics, Computer Science and Telecommunications Board.) I oversee a staff of about 18 study directors and project assistants, some of whom are on their second careers after working in a federal statistical agency. I was myself a study director for 20 years before becoming staff director in 2004.

2. What attracted you to your current position?
After having had great experiences at Mathematica Policy Research and before that at Data Use and Access Laboratories and the Census Bureau, I was nonetheless looking to do something a bit different. Miron Straf, then CNSTAT research director, reached out to me in late 1983 to direct a study on methodology for the 1990 census. I wondered how one ever produced a consensus report from a dozen experts. I not only found out, but also discovered that I loved the process of working with outstanding people to develop evidence-based and well-crafted findings and recommendations on important issues of statistics for public policy, and the process seemed to like me. The rest is history.

3. Finish this sentence: “I joined WSS to...”
I joined WSS in the mid-1980s (at the time I joined CNSTAT) to network with the broader statistical community in the Washington area, not only for my own personal benefit, but also to enhance my effectiveness in support of CNSTAT’s mission to help coordinate our very decentralized federal statistical system. I have very much enjoyed the contacts and friendships I have made through WSS.

4. What was your first job?
My first “real” job was as a social science analyst in the new Data Access and Use Laboratory (DAUL) at the U.S. Census Bureau in 1967-69. My husband and I moved from upstate New York to DC in 1967 for him to conduct his dissertation research on Booker T. Washington in the Library of Congress. One of us needed a job, and I was close to finishing my dissertation in political science from Yale. I had used historical census data in my dissertation and decided to apply at the Census Bureau. I fell into a wonderful new initiative, led by the late Jack Beresford, to help data users get ready for working with computerized summary files and public use microdata samples, which were to be offered as regular products for the first time from the 1970 census. DAUL and the nonprofit Data Use and Access Laboratories (DUALabs), founded by Beresford, where I worked from 1969-1974, trained the first generation of academic and government users of electronic statistical data.

5. Why did you join the statistics profession?
I did not begin my career as and am not now a “statistician,” in that my training was in political science with service courses in statistics and survey methods and my primary orientation to statistical data has been that of a user rather than a methodologist. But I do think of myself as a member of the statistics profession writ large. Throughout my career, I have viewed myself as trying to assist users of the government’s investment in the public good of high-quality federal statistics —by developing documentation and metadata, by promoting proactive outreach by statistical agencies to determine the needs of their user communities, and, at CNSTAT, by helping statistical and research agencies improve the relevance, accuracy, and timeliness of the data they collect and disseminate.
6. What is the most interesting statistical project you have worked on recently?
   The most interesting statistical project with which I have been involved recently is that of developing one or more major CNSTAT projects to facilitate the use of multiple data sources and state-of-the-art methods to improve statistical programs in an era of constrained budgets, falling survey response rates, and rising survey costs. We have recently obtained funding from a foundation to explore quality metrics for multiple data sources (surveys, administrative records, data streams from scanners, monitors, the Internet, etc.), conduct case studies of innovative uses of multiple data sources as proofs of concept, and develop principles and practices for a paradigm in which user needs drive the choice of cost-effective methods to obtain information rather than a paradigm of producing information from a particular survey or administrative records series, no matter its deficiencies. We also have projects from NASS and BEA about using multiple data sources for their programs. It is a very exciting area in which to be working.

7. Finish this sentence: “On an ideal Saturday, I would...”
   ... enjoy walking around Capitol Hill (where I live) with my husband, including stops at the Eastern Market, Frager’s Hardware, and—depending on which compass direction we wanted to emphasize—the Botanic Gardens on the west, Congressional Cemetery on the east, or the Yards Park on the south—ending with a late lunch/early dinner at Mr. Henry’s.

8. What is the last book you read?
   I just completed the J.R.R. Tolkien translation/commentary on “Beowulf” (completed in 1926 but just recently published by his estate), which I discovered, to my delight, is the source for much of “The Hobbit.” I read the book on my Kindle while using an exercise cycle, I find that this method enables me to read a lot of books that I would otherwise never tackle.

9. What is your favorite song/artist/genre?
   Although my son has never understood this, I am a lifetime devotee of classical music, including 18th and 19th century symphonies and concertos, oratorios, and operas. I have on occasion pointed out to my son that popular movies often draw on classical music that is no longer under copyright.

10. Have you had any great career mentors? If so, what made them great?
    The nature of my work at CNSTAT enables me to interact with many wonderful statisticians and other experts from whom I have learned much. I regard the late Janet Norwood (former commissioner of the Bureau of Labor Statistics who had retired with her husband to Austin, TX) and Graham Kalton (chairman and senior vice president of Westat) as particularly great mentors. I had the good fortune to work with each of them when they served on CNSTAT and when they chaired study panels. They both exhibited the highest standards of excellence in their own work and in what they expected of others. They set great examples of dedication to improved federal statistics and statistical agency capacities and of proactive leadership, which I have strived to emulate.
**SPOTLIGHT A WSS MEMBER!**

**Washington Statistical Society’s Spotlight on Members Program**

The WSS Board of Directors has established a program to highlight members who have made or are making notable contributions to the work of their organization or their professional field of expertise. We know that WSS members are doing interesting work in the fields of statistics, survey methodology, and the social sciences. Through this program, we hope to spotlight the accomplishments of our fellow WSS members.

This is our first request for nominations, to be featured in an upcoming issue of WSS News. We are interested in featuring members at all levels of the employment spectrum including recent graduates, mid-career employees, and those seasoned veterans.

Please feel free to nominate more than one person or a team working together. You may also nominate yourself as well. The nominees must be members of the WSS and not currently affiliated with the Board.

Please provide us with the following information about your nominee or nominees.
1. Your name, email address, and telephone number
2. Name or names of nominee(s)
3. Organizational affiliation
4. Job title
5. Their contact information including email address and telephone number
6. A brief narrative describing the reasons for your nomination
7. A photo of the nominee, although not required, would be great be greatly appreciated

Please submit your nominations or direct any questions to, John Finamore (jfinamore@nsf.gov), member of the WSS Board.

We look forward to hearing from you.
3rd Quarter Washington, DC SAS Users Group (DCSUG) Meeting 2 Speakers: 
Tuesday, September 1, 2015  8:30am to 12:00pm 
Address: 2 Massachusetts Avenue NE, Washington, DC 20212

#1. Kirk Paul Lafler via Web-Ex: 
SAS Author and SAS User since 1979. Consultant and founder of Software Intelligence Corporation, has been a SAS user since 1979. He received his BS and MS degrees from the University of Miami. As a SAS Certified Professional, Lafler provides IT consulting services and training to SAS users around the world. He is the author of several other books, including PROC SQL: Beyond the Basics Using SAS (2004) and Power AOL and Power SAS, as well as more than 500 papers and articles, and he is the recipient of nearly two dozen "best" contributed paper, hands-on workshop (HOW), and poster awards. Lafler is a frequent speaker at international, regional, special-interest, local, and in-house SAS Users Group conferences and meetings, and he is an emeritus Advisory Board member of sasCommunity.org. He also writes the popular SAS tips column, "Kirk's Koerner," that appears regularly in several SAS Users Group newsletters.

EMPLOYMENT OPPORTUNITIES

QUANTITATIVE RESEARCH ANALYST

Based in Washington, D.C., InterMedia Survey Institute, is a not-for-profit global consultancy specializing in strategic research and evaluation. Since 1995, our quantitative research alone has engaged nearly 2 million respondents in more than 100 countries, including many of the world’s most challenging environments.

The Quantitative Research Analyst conducts post-collection assessment and cleaning of quantitative data to ensure data integrity, as well as performs advanced statistical analysis and visualization of data to assist in the extraction of significant insight.

Qualifications:

Education

- Master’s Degree or higher in quantitative social science research and/or statistics.

Skills, Knowledge and Abilities

- Advanced proficiency in the use of SPSS, STATA, R or equivalent analytical software
- High proficiency in multivariate analysis, including factor, cluster and multiple regression methodology
- Knowledge of and experience with quantitative survey research and sampling methods
- Skill in data visualization
- Skill in geospatial data mapping and representation is advantageous
- An excellent team player and problem-solver with a client-focused approach to work, ideally with an understanding of international development, international media and/or strategic communications.

Compensation commensurate with experience. We invite qualified candidates to send a brief cover letter, resume and salary history to QRA@intermedia.org.

No phone calls please. Due to the high volume of responses to our ads, only shortlisted candidates will be contacted.

EOE/M/F/V/D
SPSS Statistician - Paid Internship (Part-time)

InterMedia is a not-for-profit global consultancy specializing in strategic research and evaluation. Since 1995, our quantitative research alone has engaged nearly 2 million respondents in more than 100 countries, including many of the world’s most challenging environments. We are based in Washington, D.C.

We are seeking qualified individuals who are interested in gaining hands-on work experience in survey data management and analysis. This position will assist InterMedia’s Research Team with managing data, conducting analysis with SPSS, creating graphics, and helping prepare presentations as needed.

Qualifications (Education, Experience and Special Skills)

- Bachelor’s degree in social science, statistics, and/or related discipline.
- Excellent technical understanding of data and statistical software. Excellent analytical research skills.
- Excellent knowledge of applied research.
- Excellent verbal and written communication skills.
- Ability to pay attention to detail, process work accurately, and perform multiple tasks simultaneously.
- Must be proficient in English.

This position is located in Washington, D.C. Candidates outside of the Washington, DC metro area will not be offered relocation or temporary housing allowances. We invite qualified candidates to email a cover letter and resume to Interns2015@intermedia.org.

No phone calls please. Due to the high volume of responses to our ads, only shortlisted candidates will be contacted.

# VOTING MEMBERS

**President**  
Diane Herz  
(202)-250-3529  
dherz@mathematica-pr.com

**Past President**  
Nancy Bates  
(301) 763-5248  
nancy.a.bates@census.gov

**President-Elect**  
Chris Moriarity  
(301) 270-3416  
cdm7@cdc.gov

**Secretary**  
Andrew Keller  
(301) 763-9308  
andrew.d.keller@census.gov

**Treasurer**  
Jill Dever  
(202) 974-7846  
jdever@rti.org

**Representative-at-Large**  
Jaki McCarthy  
(703) 877-8000  
Jaki.mccarthy@nass.usda.gov

Steven Paben  
(202) 691-7007  
Paben.steven@bls.gov

Kennon Copeland  
(301) 634-9432  
copeland-kennon@norc.org

Thomas Krenzke  
(301) 251-4203  
tomkrenzke@westat.com

**Council of Chapters Representative**  
Eileen O'Brien  
(202) 586-1122  
Eileen.O'Brien@eia.gov

**Methodology Section Chair**  
Mike Fleming  
(703) 631-5869  
cfleming0@cox.net

**Communications Officer**  
Tom Mule  
(301) 763-8322  
victor.t.mule.jr@census.gov
# NON-VOTING MEMBERS – PROGRAMS

## Methodology Program Chair
- **Donsig Jang**  
  (202) 484-4246  
  Djang@Mathematica-Mpr.com

## Methodology Program
- **Yulei He**  
  (301) 458-4533  
  Wdq7@cdc.gov

### Agriculture and Natural Resources
- **Mel Kollander**  
  (703) 642-8079  
  mellk@starpower.net  
  Eduardo Rodela  
  (301) 564-7586  
  rodel.eduardo@epa.gov
- **Mike Fleming**  
  (703) 631-5869  
  cfmlemingO@cox.net  
  Adam Rettig  
  (443) 465-9660  
  adam.rettig@yahoo.com
- **Barry Nussbaum**  
  (202) 566-1493  
  nussbaum.barry@epa.gov

### Data Collection Methods
- **Jonathon Mendelson**  
  (571) 858-3753  
  jmendelson@forsmarshgroup.com
- **Chris Blakely**  
  (301) 763-1722  
  clisztian@gmail.com

### Defense and National Security
- **Wendy Martinez**  
  (540) 284-1032  
  martinezw@verizon.net

### Economics
- **Linette Lanclos**  
  (202) 720-2641  
  Linette399@yahoo.com

### Human Rights
- **Michael P. Cohen**  
  (202) 232-4651  
  mpcohen@juno.com

### Public Health and Biostatistics
- **Grant Izmirlian**  
  (301) 496-7519  
  izmirlian@nih.gov  
  Carolyn Carroll  
  (202) 320-8709  
  carolyn@stattech.com

### Public Policy
- **Michael L. Cohen**  
  (202) 334-3765  
  mcohen@nas.edu
- **Jennifer Park**  
  (202) 395-9046  
  Jennifer_E_Park@omb.eop.gov

### Quality Assurance
- **VACANT**

### Social and Demographic Statistics
- **Judy Droitcour**  
  (202) 512-9145  
  droitcourj@gao.gov  
  Promod Chandhok  
  (202) 366-2158  
  promod.chandhok@dot.gov

### Statistical Computing
- **Charlie Hallahan**  
  (202) 694-5051  
  hallahan@ers.usda.gov

### Student Representative
- **Tim Allen**  
  (202) 465-1434  
  tim.allen@fema.dhs.gov
NON-VOTING MEMBERS – COMMITTEES AND OTHER BOARD MEMBERS

Quantitative Literacy
Dhuly Chowdhury  (301) 770-8234  dchowdhury@rti.org

Short Courses
Yang Cheng  (301) 763-3287  yang.cheng@census.gov

WSS Newsletter Editor
Colleen Choi  wss.editor@gmail.com

Electronic Mail Committee
S.V. (Vince) Massimini  (703) 983-5893  sum@mitre.org

Employment Column Coordinator
Anne Peterson  (703) 504-9483  apeterson@insightpolicyresearch.com

Financial Advisor and Audit Committee
Jonaki Bose  (240) 276-1257  jonaki.bose@samhsa.hhs.gov  J. Michael Brick  (301) 294-2004  mikebrick@westat.com

Historian
Dwight Brock  (301) 517-4026  dwightbrock@westat.com

Social Arrangements Committee
Shelly Craig  (202) 552-6433  SCraig@mathematica-mpr.com

Video Conferencing
Dan Gillman  (202) 691-7523  gillman.daniel@bls.gov

Video Librarian
Phil Kalina  (703) 725-6600  phil@philkalina.com

Web Master
Tim Allen  (202) 465-1434  tim.allen@fema.dhs.gov

Curtis Jacobs Memorial Committee
Brian Sloboda  (202) 693-5904  Sloboda.brian@dol.gov

Quantitative Literacy Poster Competition
Barnali Das  (301) 279-4593  barnalidas@westat.com

Quantitative Literacy Volunteer Coordinator
John Tillinghast  (301) 763-3738  John.tillinghast@census.gov

Quantitative Literacy Workshop Coordinator
Mark Otto  (301) 497-5872  mark Otto@fws.gov
