WSS ANNUAL DATA VISUALIZATION POSTER COMPETITION
FOR K-12 STUDENTS

Entries must be postmarked by the following deadline: April 1, 2019.

Are you in grades K-12 in the Washington, D.C. area?
Are you interested in answering questions about data and explaining them visually?
Would you like to win up to $100?

Then enter the Washington Statistical Society (WSS)’s Data Visualization Poster Competition!

What is a data visualization poster? A data visualization poster is a display containing two or more related graphics that summarize a set of data, look at the data from different points of view, and answer specific questions about the data.

Judging
Posters will be judged on the following criteria:

- **Overall Impact (Design)** – Poster design aspects, colors/patterns, grammar, spelling, dimensionality, readability, neatness
- **Technical Aspects (Statistical Correctness)** – Age-appropriate use of statistical methods, calculations, and interpretation
- **Clarity of the Message (Statistical Process)** – How well is the four-step investigative process implemented? How well is a story told?
- ** Appropriateness** – Appropriate, original graphics for the data
- ** Creativity!** – A unique statistical question, original dataset, or novel approach

Remember: this is not a science fair! The best posters answer an interesting statistical question using appropriate data, and must be able to stand on their own, since students are not present during the judging.
