NEWS LETTER

January 1954

INDUSTRIAL PRODUCTION INDEX

January 25, 1954

A visual presentation, "Industrial Production Index Revised," will be given by staff of the Federal Reserve Board, Division of Research and Statistics. This presentation was given at the A.S.A. annual meetings and by popular request the performance is being repeated. In addition to the subject matter, Washington statisticians and economists will be interested in the application of visual presentation techniques in explaining a complicated statistical series.

Please Note: We will meet at a different place.

Time: 8 P. M. Monday, January 25, 1954

Place: Cafeteria, 4th floor, Federal Reserve Building,
C Street entrance between 20th and 21st Sts., N.W.

Parking: Federal Reserve Parking Lot, entrance on C Street,
or in neighboring streets.

The Washington Statistical Society's annual dinner meeting will be held a little later this year to give you a chance to recover from the A.S.A. meetings. Save the evening of March 4. Dr. Robert Calkins, Director of Brookings Institution, will be our speaker.

With the 1953 annual meetings so recently behind us it sounds premature to talk about the next. But it's really not too early to start planning a Canadian vacation with a stop over in Montreal for the meetings, September 10-13, 1954. The fall timing is experimental, after many requests from the membership. Watch the American Statistician for more news.

Enclosed for your information is a program for the Middle Atlantic Regional Conference on Quality Control, to be held in Baltimore on February 5 and 6, 1954.

Margaret Martin
Secretary-Treasurer
