NEWSLETTER - JUNE 1970
ANNUAL DINNER

Daniel P. Moynihan
Counsellor to the President

"Can Government See the Light Before It Feels the Heat?"

Dr. Moynihan will discuss what, from his vantage point, the present administration needs from statisticians for its programs that it isn't getting; what needed improvements in statistical intelligence and quality it perceives; and how the statistical profession can better serve national goals. His emphasis will of course be on the area that he knows best, i.e. domestic affairs, especially the urgency of urban problems and programs.

Prior to his appointment as Counsellor to the President, Dr. Moynihan was the Assistant to the President for Urban Affairs and Executive Secretary of the Council for Urban Affairs. His previous government service included Assistant Secretary of Labor for Policy Planning and Research, 1963-69, and Special Assistant and Executive Assistant to the Secretary of Labor, 1961-63. He is currently on leave from the faculty of Harvard University.
